TECHNICAL EXPERIENCE

IBM

New York, NY

Application Developer: IBM Cloud Microservices

Full Time: January 2019 – April 2024

- Full Stack Developer for internal and client-facing web applications for data management/external learning services within the IBM Cloud Toolchain.
- Lead/Sole Full Stack Developer for an internal IBM web application data management system.
- Managed and designed database requirements to ensure scalability and security.
- Built and maintained a full-stack data management internal web React application with REST Services that scaled to 172 daily users regarding course management.
- Coached 8 junior developers on best practices and quality assurance, using established coding standards and methodologies.
- Developed 200+ reusable and reliable platform components increasing the UI efficiency.
- Implemented server-side logic with Node.js and Express.js for robust and scalable web services.
- Deployed applications using Docker and managed CI/CD pipelines with Github.
- Leveraged SQLdatabases for optimized data storage and retrieval.
- Ensured data security and integrity through rigorous testing and best practices.

Jri-America Inc. (Division of SMBC)

New York, NY

Junior Software Developer, Java Applications Development

Full Time: July 2017 – January 2019

- Software Developer for a client-facing web application and web services, focusing heavily on client communication for a large-scale cash management system.
- Building proprietary software used inside the Bank for purposes ranging from portfolio management to compliance operations.
- Working in an Agile environment, placing an emphasis on writing clean, reusable code in Java to achieve the goal of creating scalable software.
